1) The purpose of the site is to show off and allow for greater community reach for the schools car club.
2) Show photos, allows people to see the executive members of the club, allow people to join the club, and show meeting times
3) The intended audience for the site is students of USC
4) This website is solving our recruiting and outreach issues the club struggles with.
5) The working titles I have so far, the home page, about us, meeting time, members page, and a join us page.
6) Ill ask members if I can take headshots of a few for the pages. And I have access to photos and social media accounts since im the vice president of the club
7) The site will use a form by allowing people to enter their contact info to join the club.
